

An efficient, streamlined,
convenient tool for
managing labor

STARS

ABOUT US

STARS Labor Management Software streamlines daily operations for businesses of all sizes. Our software is designed to enhance productivity and workforce management while offering a high degree of flexibility to meet the unique needs of each organization. We accommodate both union and non-union contracts, ensuring compliance with labor laws.

Our IOS/Android app provides messaging, scanning, and dispatching. It facilitates attendance tracking and accurate job history for your staff.

Our software generates detailed payroll and billing reports that seamlessly integrate with accounting and payroll applications. By consolidating labor management into a single platform, enable managers to focus on decision-making, reducing chaos and improving overall efficiency. Unlock your business's potential with STAR's.

FEATURES

01 LABOR PLAN

Create, modify, and monitor job schedules, ensuring that the right staff members are assigned to the appropriate locations and shifts, optimizing productivity and maintaining consistent service delivery. With these capabilities, businesses can effectively manage their workforce and improve operational efficiency.

02 TIME TRACKING

Track employee working hours, overtime, and absences. STARS provides accurate data for payroll processing. It can also help maintain compliance with labor laws and company policies.

03 DISPATCH

Get job assignments into workers hands right away. Have real-time visibility of who accepts or declines work. Communicate to staff updates and job-related documents. Receive responses to important questions from your workforce on the ground, all without leaving your desk.

04 CONTRACTS

Quickly input contract agreements, create quotes, final costs, and payroll for any job size. STARS is able to handle payroll for complex union rules and positions across the nation. By combining contracts with overtime (OT) logic in Time Tracking, you can accurately track and report for any situation.
